

NUKI UNIVERSAL CYLINDER

DATA SHEET

THE IDEAL LOCKING CYLINDER FOR YOUR NUKI SMART LOCK

Nuki is compatible with common European locking cylinders. However, in some cases, it is necessary to replace the cylinder. The most common reason for this is that the cylinder doesn't have an emergency function, in which case we would not recommend using our Nuki Smart Lock. That's why, to help make even more doors smart, we have developed our own Nuki locking cylinder alongside the industry experts at M&C – more than secure.

ADVANTAGES

- Developed as a modular solution, the locking cylinder is easy and straightforward to lengthen or shorten to the right size.
- There are 33 possible cylinder dimensions that make the Nuki Universal Cylinder compatible with almost every door in Europe.
- Developed with the industry experts at M&C – more than secure and meets EN and DIN standards
- This Universal profile cylinder corresponds to the highest possible security class SKG***. In other words, the Nuki Universal Cylinder offers maximum protection against break-ins and manipulation.
- 5 keys are included with delivery. Additional keys can be ordered with the enclosed security card.
- Thanks to the built-in emergency function, the door can still be locked from the outside with the key after the Nuki Smart Lock has been installed on the door from the inside.

TECHNICAL SPECIFICATIONS

Weight:
261 g

Dimensions:
121 x 33 x 9 mm (maximum length)

Security:
Security class SKG***

Features:
33 possible cylinder dimensions,
compatible with almost every door
in Europe
